

GEMPACK and RunDynam licence activation

From 2018 some GEMPACK and RunDynam licences must be activated with a code to ensure the software continues to work. We explain below the procedure for RunDynam -- but the GEMPACK procedure is nearly identical.

If your RunDynam licence requires activation

- you will be prompted to activate during installation of RunDynam,
- alternatively, you may launch the activation process from the RunDynam *Licence Information* dialogue. Click the *Check* button on the RunDynam Introduction page (for GEMPACK activation, choose *Help..GEMPACK licence*).

Requesting activation code

In the licence activation window (1) verify the correct product (GEMPACK or RunDynam) is selected, (2) if necessary select the licence file to be activated (usually the default licence file will be selected for you), (3) complete your name and email information, and enter the name of the city or town where the licence will be used, (4) click the Request Activation Code button.

When the activation request has been submitted a message appears saying an email has been sent to the email address you supplied. Please check your email for your activation code and proceed with completing the activation procedure below. If the licence server is not accessible a message will appear asking you to email a specified activation request file to sales@gempack.com.

Completing licence activation

When you have received your licence activation code by email you can complete the activation procedure. Re-open (if necessary) the licence activation window by clicking *Check* on the RunDynam Introduction page, then clicking *Activate Now*. Copy your activation code from the email and paste it into the *Enter Activation code* box and click the *Activate* button.

After installing or updating RunDynam, you need to activate within 30 days in order to keep using RunDynam. You must have a valid RunDynam licence to activate. To activate, enter your email address into the box below and click the Request Activation Code button. Then check your email – you should receive the activation code shortly. Paste the activation code into the second box and click the Activate button: you should receive a message telling you that activation is complete.
